

“

I don't have role models I can look up to, so I wasn't sure how I could give my daughter a good future until I found Hope House. I'm currently going to Front Range Community College earning my associates of science degree to get into a sonography program. I am more excited now than ever for mine and my daughter's future!”

-Shanice, teen mom

Located in the Learning Lab, the College & Career Program features free access to laptop computers, printers and the Internet! The College & Career Program at Hope House is designed to help our teen moms succeed in college and in their chosen career path, providing practical tools and support including advising, tutoring for any kind of class, computer/ printer access and more. Hope House builds workforce partnerships that provide opportunities that support moms through their career path, from job readiness to job skills development to career development. It is our goal to help our teen moms build careers that pay a wage that will allow them to be self-sufficient.

COLLEGE SUPPORT

- Academic goals consultations

“ Hope House has helped me so much with succeeding academically. Aside from helping me financially for the program, they always made sure they were available if I needed help or had any questions with my certification. They helped me with printing for my courses, writing a professional resume and getting a job search started. I am so thankful for the support I received through my dental assistant program.”

- Cindhia, Hope House teen mom
